CADA 360 Security Services

Manage your lot, locate stolen vehicles and generate new F&I revenues

CADA members can now take full control of their inventory with the CADA 360 Security Services program, powered by RecovR. This solution allows dealers to monitor vehicle location on and off the lot and to offer a valuable new product to consumers.

MORE CONTROL, MORE REVENUE, NO UPFRONT COSTS

With RecovR, a wireless GPS locator that only takes 30 seconds to install, dealers can:

- Find cars with ease
- Reconcile and resolve inventory discrepancies
- Get notified when a vehicle leaves the lot after hours
- Track missing vehicles and provide a tracking link to police
- Satisfy the requirements of Garage Insurance providers

Dealers can also choose to sell RecovR through to their end-customer as a powerful theft recovery product to satisfy the requirements of the retail customer's insurance provider.

It all comes back to you...

It's more than a tag line, it's our guarantee to dealers. Participation in CADA 360 programs helps provide financial support to CADA for dealers' advocacy initiatives. The more dealers who participate in CADA 360 programs, the greater the level of funding available for CADA advocacy.
